

Learning Plant Language Workshops

conducted by Wayne Smith (agronomy.com.au)

Learn what is wrong with the nutrition of your crops just by looking at them. Text books show one deficiency at a time, but most crops have several nutrition problems, and some are also droughted, or waterlogged, or diseased etc. You can still see what is wrong and know which problem needs to be fixed first. Workshops are 3.5 hours and include a book showing all the slides presented. Morning tea is included. Cost is \$275 inc GST. per person.

Each Workshop is 8:30am registration for a 9:00am start. Workshops finish ~12:30pm.

Please see page 2 for the list of the current locations for a planned workshop.

Limited seats available. Please call or email to register your intent to attend on 08-9842 1949 or office@agronomy.com.au

Please call or email to reserve your spot.

Books will only be printed for those who notify us of their intent to attend.

If you do not see a workshop location near you, please let us know ASAP where you would like one. We will run as many workshops as requested as long as there are 10 or more people in attendance.

It is very important to let us know ASAP if you want to attend a workshop to reserve a seat, and for us to have enough books printed and to know if there will be enough numbers.

Each Workshop is 8:30am registration for a 9:00am start.
Workshops finish ~12:30pm.
